

### Field Service/Installations -

Repair services are available for existing FRP applications. These include inspection and consultation services as well as repair or replacement of worn out and damaged chemical service fiberglass reinforced plastics. We are also able to provide crews for new installations.

### Pipe - FRP

- 1/2" through 168" diameter
- Elastomeric liners available
- Filament wound or contact molding
- FRP armoring of thermoplastic pipe
- Abrasion resistant lining with special resin systems

### Duct - FRP

- Conductive and abrasion resistant liners
- Round duct up to 168" diameter
- Sprinkler and explosion blow out protection
- Rectangular duct custom made to requirements

### Tanks - FRP

- Round filament wound or contact molded through 14' diameter in factory sizes
- Segmented and field erected for larger sizes
- Custom made rectangular tanks of contact molding available

**Tanks - Regular** - Steel round or rectangular with the following linings available:

- Chemical resistant fiberglass
- Acid brick
- Non-Reinforced
- Chemical resistant Glassflake
- Thermoplastic sheet coating

### Pultruded Structural Shapes - FRP

- Available in stock lengths or fabricated to your needs
- Wide flange and "I" beams
- Flat sheet and strip
- FRP nuts and bolts
- Angle, channel, square, and round tube

### Specialty Fabrication

- Can provide items produced by:
- Resin transfer molding
- Centrifugal casting
- Injection molding of thermoset plastic resins

## FiberSystems

**521 Kiser Street  
Dayton, Ohio 45404-1641**

**Phone: (937) 222-9000  
Fax: (937) 222-9020  
e-mail: sales@ifs-frp.com**

### Flooring Systems

- High quality chemical resistant floor protection systems
- Available in liquid form or as an installed finished product
- Tailored to meet plant needs from general good appearance to severe chemical resistance
- Impervious monolithic corrosion resistant coating available for when other floorings are not practical.

**Paint Coatings** - Corrosion resistant paint coatings for protection of structural steel, exteriors of pickling and plating tanks, fume ducts, and stacks made using:

- Epoxy
- Neoprene
- Vinyl industrial paint
- Hypalon

### Floor Grating and Stair Tread - FRP

- Both hand lay up and pultruded styles available in either sheet form or customized to your requirements
- Structural components and safety hand rails provided as stock sizes or customized sizes
- Installation available

### Secondary Containment Systems

- Pipe in pipe containment systems
- Tank in tank containment systems
- Can fabricate or line dike and trenches with chemically resistant materials to contain a leak or spill
- Design, build, and certification capabilities

**Glassflake Lining** - Distributor and authorized installer of chemical resistant Glassflake lining material. This material is used for new and repair linings of concrete, steel, and FRP tanks and primary containment systems as well for secondary containment linings on tank farm and pipe requirements.

**Machining** - Able to machine metal and composite materials according to your specifications to achieve:

- Surface finish
- Structural form
- Dimensional tolerance
