## **Your all-in-one source for FRP Composites!**

To meet your corrosion resistant requirements:

### **Pipe, Duct & Stacks:**

- 3/8" through 168" diameter
- filament wound or contact molded
- round, rectangular, elliptical
- customized liner types and thicknesses
- customized resin matrices
- double containment systems
- factory assembled isometric spools

### **Fittings:**

- NPT threaded couplings, adapters, reducer bushings, plugs, flanges, and nipples
- bell end, plain end, flanged end, and combination coupled fittings available
- couplings, adapters, nipples, reducer bushings, pipe caps, fitting caps, elbows, tees, concentric and eccentric reducers, laterals, true wyes, and more!

### **Flanges:**

- 150 lb. socket
- 300 lb. socket
- reducing socket
- heavy duty hubless
- Van Stone style
- stub flanges

### **FRP Armored Thermoplastics:**

- PVC
- CPVC

### **Engineered Resin Technology:**

- vinylester (standard, high temperature, fire retardant), vinyl polyester, epoxy (standard, high temperature), polyester (isophthalic, terephthalic), furan, phenolics
- dual laminate construction
- abrasion resistant, fire retardant, conductive, low flame spread/smoke toxicity

### **Tanks, Vessels & Scrubbers:**

- round or rectangular
- contact molded or filament wound
- Through 14 foot diameter

### **Field Service Repair & Installation:**

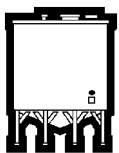

- inspection & consultation services
- emergency repair and replacement
- new installations
- training and supervision services
- remedial services
- coatings and linings

### **Associated "Sister" Companies:**

- **FiberSystems** - field service repair, installation, remediation services, inspection, and training services
- **Pipe Supports** - custom engineered pipe and duct supports for FRP
- **Response Metal Fabricators** - full service heavy metal & sheet metal fabrication shop
- **International Reactor** - manufacturer of chemical process reactors and turn-key process equipment
